Discover Why More Than 50% Of Your Patients Would Benefit From In-office DXA Scanning!

Improved Patient Care.
Increased Revenue Opportunities.

Enhance your Primary Care Physician practice with the Discovery™ bone densitometry system from Hologic. DXA scanning is a vital link for many patients as determining the status of an individual's bone mineral density (BMD) can be a critical factor for proper diagnosis and treatment.

Patients at Risk in Your Practice:

- All postmenopausal women.
- Patient taking prescribed drugs that induce bone loss (proton pump inhibitors, serotonin reuptake inhibitors, steroids, and tamoxifen).
- Women aged 65 and over.
- Men past the age of 70 or men under 70 whom are at risk of osteoporosis.

In-office bone densitometry can be a dynamic solution to lagging financials. It could afford you the possibility of an exceptional return on investment (ROI) and provide an opportunity for you to grow your practice through stabilized reimbursement to achieve long-term success.*

Hologic's Discovery systems can evaluate your patients for osteoporosis, obesity, and cardiovascular risk.

Learn how bone densitometry can impact your practice today by calling your Henry Schein representative.

FIGHT ALLERGIES AND SUPPORT BREAST CANCER RESEARCH EVERY TIME YOU WEAR IT.

Micro-Touch® NitraFree™ is unlike any other nitrile exam glove. It provides powerful protection against Type I latex allergies – *and* reduces the potential for Type IV chemical accelerator*-based allergies. It's also FDA approved for handling chemotherapy drugs. And every time you wear it, proceeds go to Susan G. Komen for the Cure†. No other pink glove does so much to protect healthcare practitioners – and women across the world.

For samples and more details, call us at 800-952-9916, and to share your story about how you or your loved ones have been touched by breast cancer, visit ansell.com/powerofpink.

When quality is at the core of every decision you make…
Trust Hemoccult ICT—the only immunochemical fecal occult blood test clinically tested over an extended duration and proven to work. Our dry-slide process has provided excellent proven results for over 40 years.
Excellent 14-day stability—developed with dry-slide technology, which increases stability of the sample—allowing for multiple-day collection and necessary transit/development time.
Higher sensitivity and specificity—clinically proven to have a relative sensitivity of 100% and, apparent specificity of 99.1%.
No drug or dietary restrictions—Hemoccult ICT is specific to intact human hemoglobin—eliminating interactions from red meat, vitamin C, and other, factors that lead to false positives.
The right choice—meetings the American Cancer Society and the U.S. Task Force for Colorectal Cancer (CRC) Foundation recommendation of multiple-day testing for CRC.
For information on developing a colorectal cancer screening program in your office, contact your Henry Schein representative today.

Hemoccult® ICT Tests

Next-generation fecal occult blood test (FOBT) for colorectal cancer screening. Specific for human hemoglobin, this immunochemical test eliminates all diet and drug restrictions. Specific for lower GI bleeding, resulting in fewer false positives and a reduction in unnecessary invasive procedures.

- CLIA waived; easy test procedure
- **Made in the USA**
- Screening reimbursement code: G0328QW

#395065A, Collection Card Set
(834-7610) .....ea
Contains: 100 cards, 100 applicator sticks, physician instructions & sample collection instructions.

#395066A, Screening Kit
(834-3249) .....ea
Contains: 1 box of 40 patient screening kits. Each patient screening kit contains: 1 dispensing envelope with patient instructions, 3 Hemoccult ICT collection cards, 3 flushable collection tissues, 3 applicator sticks & 1 mailing pouch.

#395067A, Test Kit
(834-6389).....ea
Contains: 20 test devices & 1–1-mL bottle Hemoccult ICT buffer (to be used with Hemoccult ICT collection cards & patient screening kits).

Alere™ Cholestech LDX® System

Complete Lipid Profile, Glucose

Lab-accurate lipid profile, glucose, ALT, AST, and hs-CRP results in about 5 minutes* from a simple fingerstick. Allows provider to get results while patient is still in office—provider can counsel and intervene face-to-face. This improves patient compliance and increases control and management of heart disease and diabetes. Reimbursable by Medicare and most private payers.

- CLIA waived**
- Procedure saves time and enhances productivity
- Small, tough, and portable
- Eliminates anxiety of venipuncture; requires only a fingerstick
- On-the-spot adjustment of therapy and improved patient compliance
- Accuracy comparable to laboratory tests
- Saves time: fewer follow-up visits required
- Enhances compliance through teachable moments between healthcare providers and patients

#10-959, Analyzer

HENRY SCHEIN®
BRAND PRODUCTS

Rely on Us

InSure® FIT™ Fecal Immunochemical Tests (FIT)

Test provides high sensitivity and ease of use with a simple, water-based collection method designed to be more patient-friendly. The patented brush sampling replaces unpleasant fecal collection or smearing. No dietary or medicinal restrictions, enhanced specificity and sensitivity for more productive colonoscopies. The InSure® FIT™ is based on the immunochemical detection of human hemoglobin (Hb) as an indicator of blood in the stool. The assay uses a monoclonal antibody to capture Hb on a test strip during test development. Since globin does not survive passage through the upper gastrointestinal (GI) tract, the presence of globin in the stool indicates bleeding in the colon or rectum. Clinical studies have demonstrated high sensitivity and specificity of the InSure® FIT™ test in colorectal cancer screening.

- 87% sensitivity for colorectal cancer*
- 98% specificity*
- 66% increase in patient compliance vs. a guaiac-based fecal occult blood test (gFOBT) was found in one study*
- No handling/smearing of dry, solid fecal materials*

Making FIT Happen

The Inconvenience and Mess of Fecal Occult Blood Tests Are Over

InSure® FIT™ Fecal Immunochemical Test for Early Detection

InSure® FIT™ is the sensible take-home multiple sample method made simple, quick, and easy for you and your patients. It features the only patented, water-based collection method with two samples on one test card meeting American Cancer Society Guidelines* for Colorectal Cancer Screening.

Unlike other FOBTs that require fecal handling and test-card smears, InSure® FIT™ is the one test with no mess. With a gentle brushing of the stool in water, InSure® FIT™ provides 87% sensitivity and 98% specificity for colorectal cancer. What's more, this unique, convenient method promotes high patient compliance.

Help Your Patients Get FIT and Stay Healthy

For a limited time, InSure® FIT™ Sample and Educational Packages are available for you to trial FREE. To learn more about how you can make FIT happen, contact your InSure® FIT™ Representative, visit www.insuretest.com, or call 1.800.531.3681.

*The American Cancer Society recommends for people over 50 a multiple sample method for take home FOBT or FIT screening test; FOBT or FIT testing done during a digital rectal exam in the doctor's office is not recommended.

T-DOC® Air-Charged Abdominal Catheters

Abdominal catheter can be placed rectally or vaginally to measure abdominal pressures. Rigid design assures no folding during insertion. A soft tip protects bowel and/or vaginal tissues. Small balloon size provides excellent recording with minimum patient discomfort. Ideal for both adult and pediatric studies.

#T-DOC-7FA, Abdominal Catheter, 7 Fr
(280-0015) 10/box

T-DOC® Air-Charged Single Sensor Bladder Catheter

Single Sensor Bladder Catheter is a general-purpose recording catheter for adult and pediatric bladder pressures. Catheter has separate filling lumen, which provides infuson rates up to 100 cc per minute.

#T-DOC-7FS, Bladder Catheter, 7 Fr
(280-0010) 10/box

T-DOC® Air-Charged Dual Sensor Radiopaque Catheter

A specialty bladder and urethral recording catheter designed for video cystometry. Tungsten reflective markers allow you to observe exact sensor placement within the bladder and urethra via fluoroscope. Sensors are 6 cm apart, allowing for bladder pressure to be viewed while observing static urethral pressure during fill and/or dynamic urethral pressure profiles. Catheter has a separate filling lumen, which provides infusion rates up to 100 cc per minute.

#T-DOC-7FDR, Radiopaque Catheter, 7 Fr
(280-0012) 10/box

T-DOC® Air-Charged Dual Sensor Catheters

The Dual Sensor Catheter is designed to simultaneously record bladder and urethral pressures. Sensors are 6 cm apart, allowing for bladder pressure to be viewed while observing static urethral pressure during fill and/or dynamic urethral pressure profiles. Catheter has separate filling lumen which provides infusion rates up to 100 cc per minute.

#T-DOC-7FD, Dual Sensor Catheter, Fr
(280-0016) 10/box

T-DOC® Air-Charged Single Sensor Radiopaque Catheter

A specialty bladder-recording catheter designed for video cystometry. Tungsten reflective markers allow you to observe exact sensor placement within the bladder via fluoroscope. For both adult and pediatric studies conducted under fluoroscopy. Catheter has a separate filling lumen, which provides infusion rates up to 100 cc per minute.

#T-DOC-7FSR, Single Sensor Radiopaque Catheter, 7 Fr
(280-0013) 10/box

T-DOC AIR-CHARGED CATHETERS
Accuracy, not artifact.
Coudé tip catheter is designed to easily pass through male urethral strictures.
Latex free, disposable and economical.
The choice of major universities, clinical educators and more continence clinics than any other technology.
Set up is easy because there are no transducer height adjustments needed and no air bubble artifact.
360° circumferential area pressure records true urethral functionally with less artifact.

Bovie AARON MEDICAL

Aaron 940™

Designed and engineered to be the most reliable and durable desiccator available today, the unit's life is prolonged by incorporating the latest in chip technology and reducing the number of internal parts, thereby generating less internal heat. Postprocedure and long-term cleanup are simplified by its nonabsorbing, nonstaining, high-impact plastic case. It continuously monitors every aspect of the unit's output. At the sign of any problem, the machine instantly disables the output and displays the appropriate error code on the display. The Bovie® 3-Button Handpiece is better designed inside and out. The basic function of a 3-button handpiece is to allow the user to control power up/down and to activate the high-frequency desiccator. The Aaron 940™ has a technology advantage right in the handpiece: a superbly engineered collet that's even gold-plated for superior conductivity. The collet is attached to the circuit board and the entire handpiece is encapsulated and formed in a high-tech polymer that combines comfort with a sure grip. The buttons on the handpiece have been designed for superior tactile feel and comfort.

- Dimensions: 15.9 cm (6.3") H x 22.2 cm (9") W x 11.4 cm (4.5") D
- Weight: ≤1.4 kg (≤3 lb)
- Output Power: To 40 watts (0–10 watts in 1/10th watt increments on both mono and bipolar)
- Output Frequency: 550 kHz
- Line Frequency: 50–60 Hz
- Warranty: 2 years

Bovie AARON MEDICAL

AARON 950™ High-Frequency Electrosurgical Generator

First high-frequency desiccator with Cut. It features Cut, Blend, Coagulation (60 W each), Fulguration/Desiccation (35 W), and Bipolar (30 W) modes with 6 presets for the veterinarian's favorite settings. Easy-touch color-coded membrane pads, on front panels, allow for quick selection of each setting. Power output may be increased or decreased via the 3-button handpiece or the rotary power-control dial. For maximum flexibility, a complete line of disposable and reusable electrodes (blade, ball, needle, and loop) and bipolar forceps are available.

Soothing, Protective, Moisturizing...

Therapy In the Palm of Your Hands!

The ONLY gloves that provide all natural therapeutic skin protection to the users' hands. CRITERION® COATS™ gloves are made with enriched colloidal oatmeal USP which is an FDA recognized skin protectant drug that soothes, moisturizes, and protects the skin.

CRITERION COATS contains all natural Colloidal Oatmeal USP which through a combination of patented and proprietary processes is added as a coating to our barrier protective gloves. During typical glove use, CRITERION COATS can provide continuous transfer and delivery of unique skin protection. Through this innovative drug delivery mechanism, CRITERION COATS can help the glove user maintain the health and integrity of the most important and effective barrier, the skin.

BRAND PRODUCTS

GREAT SAVINGS!

HENRY SCHEIN®
DISPOSABLE VAGINAL SPECULA
Recommended for routine gynecological exams.

- Allows examination of vaginal mucosa at a 360° angle without rotation
- Provides wide range of adjustability (angular and elevation adjustments)
- One-handed manipulation for ease of operation
- Self-holding in various opening positions
- Decreases risk of contamination
- If needed, apply lubrication for better comfort during examination
- Made of hard, clear, nontoxic, high-strength plastic resin

Small
(102-5396) 10/pkg

(102-5397) 10/pkg
Large
(102-9422) 10/pkg

HENRY SCHEIN®
NON-FENESTRATED DRAPES
Sterile
Polylined, Nonfenestrated, Tissue/Poly/Tissue

- Heat sealed along 2 outer edges to ensure a pinhole-free plastic layer that guarantees maximum protection against bacterial strike-through from below
- Features polyethylene lining between 2 layers of absorbent-strength tissue, virtually eliminating risk of bacterial migration and strike-through
- Using blue-tissue side up prevents glare
- All sterile fields are available in convenient dispenser boxes of 50 each

Blue, 18" x 26"
(900-4686) 50/box

HENRY SCHEIN®
DISPOSABLE VAGINAL SPECULA–LIGHT SOURCE COMPATIBLE
Disposable specula are made of high-strength, clear, nontoxic plastic. Allow examination of the vaginal mucosa at 360° angle without rotation. Provide wide range of adjustability (angular and elevation adjustments), ease of operation and manipulation with one hand. Self-holding in various opening positions. Single use of speculum decreases the risk of cross contamination. Compatible with corded light source of leading brands, eliminating the need for positioning a light source independently.

(104-2410) 3" x 3" 200/pkg

(104-2411) 4" x 4" 200/pkg

HENRY SCHEIN®
PREMIUM NON-WOVEN SPONGES
Non-sterile, 4 Ply

General-use, nonwoven rayon/polyester-blend material. Quarter fold. Low linting.

- Less linting: minimizes lint contamination
- Soft and pliable: prevents irritation to mucosa
- Greater absorbency: reduces number of sponges required
- Closed weave

(101-9278) 2" x 2" 200/pkg

(101-8748) 3" x 3" 200/pkg

(101-4336) 4" x 4" 200/pkg

HENRY SCHEIN®
GAUZE PADS
100% Woven Cotton, Sterile 1's in Peel-Back Packages, 12 Ply

- Highly absorbent
- 100% woven cotton
- Can be used for general cleaning, debriding, and prepping
- Box is perforated at bottom for easier gauze removal

2" x 2"
(100-4380) 100/pkg

3" x 3"
(100-3963) 100/pkg

4" x 4"
(100-2634) 100/pkg

HENRY SCHEIN®
SYNGAUZE 50™
Non-sterile, 4 Ply

General-use nonwoven material with a 70%/30% blend of rayon and polyester. 47%–50% more absorbent than 12-ply gauze.

- Absorbs 10 times its weight: greater absorbency reduces the number of sponges required
- Soft and pliable: prevents irritation to mucosa; allows shaping for a better fit
- Sterilizable: lint-free mesh minimizes lint contamination
- Nonraveling: less mess

2" x 2"
(100-2125) 200/pkg

HENRY SCHEIN®
MAXITABS®

- Provide safe and effective cleaning properties in multiple cleaning cycles throughout the day
- Does not leave a residue on instruments or insidetank
- 1 tablet makes 1 gallon of solution
- 1 box makes 32 gallons

General Purpose Cleaner
(900-4088).....32/box

Tartar and Stain Remover
(900-4089).....32/box

HENRY SCHEIN®
MAXIZYME® TABS
Enzyme cleaning tablets for ultrasonic cleaning, evacuation system cleaning, and instrument presoak. 2 tablets dissolve easily in 1 gallon of warm tap water. Easy to use; requires less storage space.

- Contains protease enzymes that break down hard-to-clean deposits such as blood, bone, and food particles that chemical detergents leave behind
- Gentle on instruments: nontoxic, neutral pH, biodegradable, and noncorrosive formula that contains no chlorine or harsh alkalines to damage expensive stainless steel instruments

(900-0475).....64/box

HENRY SCHEIN®
MAXIZYME®
Dual Enzymatic Detergent
Nonfoaming, fast-working, dual-enzymatic detergent for use as a presoak, manual detergent, ultrasonic detergent, and evacuator cleaner. Dissolves blood, tissue, mucus, and other protein-rich body fluids from instruments. Noncorrosive, nonflammable, and rust inhibiting. Concentrated and economical.

- Contains 2 gold-standard proteolytic enzymes for more effective cleaning
- Safe for instruments

1-gal Bottle
(101-9031).....ea

HENRY SCHEIN®
SURGICAL MILK
Super Concentrated
Stops corrosion and maintains free-working instruments. Nontoxic and safe to use. Permits autoclaving of sharps and carbon steel. One gallon of Surgical Milk diluted with 5 gallons of tap water makes 6 gallons of immersion bath milk.

1-qt Bottle
(115-9589).....ea

1-gal Bottle
64-fl-oz Bottle
(102-5539).....ea

HENRY SCHEIN®
MAXIWIPE™ GERMICIDAL CLOTHS
Cleans and disinfects common hard, nonporous surfaces. Bactericidal, tuberculocidal, and virucidal. Effective against 13 microorganisms including TB, HBV, MRSA, VRE, and RSV. Contains 55% alcohol. Meets CDC and OSHA regulations.

- No mixing, no measuring—just pull, wipe, and throw away
- EPA registered

Stainless steel chestpiece. Drum converts from pediatric diaphragm to extra-deep adult bell.

- Sensitive multifrequency diaphragms
- Bilumen stainless steel binaurals
- Ultrasoft, threaded eartips
- Non-chill bell and diaphragm rim for patient comfort
- Binaurals fixed at 15° angle for comfort and acoustic seal
- Extra-deep bell for low frequency response
- 19" bilumen PVC tubing for soft flexibity

HENRY SCHEIN®
PRO PLUS SERIES CLOCKFACE ANEROIDS

Latex-Free

Each aneroid features:

- Large, easy-to-read 6" luminescent dial for high visibility in virtually any light condition
- 300mm-Hg, CE marked, no-pin stop movement withstands the heaviest use
- Inflation system includes black nylon cuff, latex inflation bladder, bulb and valve, and 8' length (when extended) of coiled latex tubing
- Contemporary Euro-style ivory casing complements any decor
- Complete with all necessary hardware and assembly instructions
- Available in wall or mobile configurations
- Assembled, inspected, and packaged in the USA from foreign components

Wall Aneroid also includes:

- Wall bracket that swivels through 110° rotation for easy viewing with integral cuff storage

Mobile Aneroid also features:

- Height-adjustable Spider-Leg™ caster stand with range of 34" to 48" (from bottom of base to top of unit)
- Integral ABS cuff-storage compartment
- Manometer is angled back 15° for easy viewing
- 18" base diameter

MIDMARK

Digital IQecg™

Features include:

- Lightweight, portable design, weighing less than 11 oz
- View and monitor live, 12-lead ECG in selectable formats on screen
- Interpret and analyze data for neonate, pediatric, and adult patients via the Midmark 12-lead Resting Electrocardiogram Analysis Program
- Review and edit ECG results on screen with free text or customizable quick-edit statements
- Perform serial comparison with overlay of up to 4 ECG tests
- Save time and reduce data-entry errors by populating patient information directly from your EHR/EMR software
- Facilitate paperless office strategy: eliminate costs of thermal paper and the hassles of scanning and filing patient charts

IQholter™ Recorder

Midmark IQholter™ Recorder is small and lightweight, only 2.8 oz. Well-lit display and intuitive keypad make clinician navigation and menu control easy. On-screen leads and channel identification for speed and simplicity during patient hookup. Automatic startup self-test with warning alarm ensures reliable recording. 5-lead hookup for 3-channel recording; 7-lead option available. 24-hour standard recording 48- and 72-hour recording capabilities available). Removable Secure Digital (SD) card allows for immediate patient turnaround.

IQholter™

IQholter™ offers color-coded arrhythmia events to identify different ECG morphologies, and comprehensive reports with auto narrative summary to effectively reveal important test data and statistics. Ability to edit and review test results and full disclosure locally or on the network without printing.

IQholter™ EX

IQholter™ EX provides the ability to preview and adjust criteria settings to match patient's recording before the analysis and identifies atrial fibrillation (AF) events based on parameters set by the clinician. Smart Page Scan highlights specified events and reveals entire episodes at a glance. Arrhythmia Templates with Intelligent Sorting facilitate quick reviews and edits with QT and QTc analysis for identifying prolonged intervals.

IQholter™ EP

IQholter™ EP offers all the standard features of IQholter™ and IQholter™ EX with pacemaker detection to identify single and dual-chamber paced beats for noncaptures and sensing failures. Automatic pacemaker detection eliminates setting changes between patients.

Burdick® Atria 8500 ECG

This 12-lead resting portable ECG/EKG shows you what you need, comfortably. Features a friendly user interface, multiangle 7" widescreen, and a color display that makes reading waveform data easy. Protocol choices streamline your workflow.

Benefits:

- *Convenience.* Export records to network drives, USB, or EMRs. Store up to 300 ECG records
- *Connectivity.* Comes with Ethernet connectivity as a standard feature. It's compatible with wireless 802.11, and has bidirectional communication with our HeartCentrix® connectivity solution
- *Ease of use.* The easy-to-clean keyboard, dedicated function keys, intuitive menu, and on-screen QuickTips make it easy to use
- *Performance.* The AccuPrint™ feature restricts ECG printing if 10-second data quality is poor, ensuring a clear printout and eliminating retakes

- *Pediatric applications.* The optional interpretation package lets you calculate interpretations down to a 1-day-old infant
- *Flexibility.* The unit manually or automatically produces high quality 3-, 4-, 6-, and 12-lead ECG printouts
- *Durability.* Known for its legendary durability and dependability, Burdick is the preferred name in digital ECGs, for practices and clinics
- *Primary or acute care use.* The interpretation package provides a choice of brief or full-format statements (including reason statements)

		NO DEDUCTIBLE NO CO-PAY

With preventive services being a cornerstone of the Affordable Care Act, a 15 minute obesity preventive visit will generate, on average, $172 in net revenue with no deductible or co-payment. A practice looking to expand and increase revenue no longer needs to generate more new patients to their practice but can focus on the obese patients in their existing practice that they see daily for the 53 diseases related to obesity including hypertension, type II diabetes and cardiac disease. Find out how a small investment can increase practice revenue by **$20K** per month!

Why move to devices and IV administration sets produced with non-DEHP materials?

A lower risk alternative

Patient safety is an important consideration. The reduction of DEHP from healthcare products reduces the risk of adverse effects among neonates and other high-risk patients.

A "green" standard

Efforts to minimize the release of DEHP into the environment are becoming increasingly common among healthcare facilities. Choosing non-DEHP products helps to support that endeavor.

An efficient solution

Choosing non-DEHP products provides the opportunity to standardize. Product selection and efficiency may be enhanced with a smaller, more manageable inventory.

Reduced risk, less harm to the environment and greater efficiencies may not be the only benefits of non-DEHP materials for YOUR organization. Have you thought about what other benefits might be generated by moving to non-DEHP devices and sets?

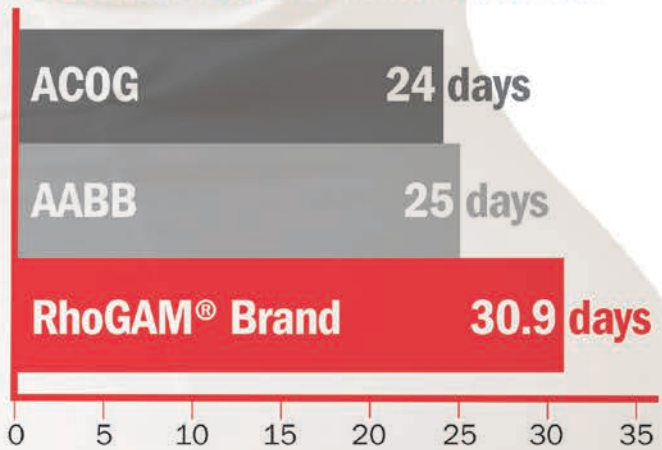
For Rh-negative patients

Protection that stands the test of time

RhoGAM® Brand aligns with ACOG and AABB recommendations[1,2,3]



This chart shows that the mean elimination half-life of RhoGAM® Brand exceeds the half-life on which the ACOG (American Congress of Obstetricians and Gynecologist) and AABB (American Association of Blood Banks) dosing guidelines were based.

During the critical prenatal time

- All Rh-negative expectant moms must be protected from Rh sensitization
- Risk of sensitization increases as pregnancy term progresses[1]
- The greater the half-life of an anti-D product, the more anti-D that is present at pregnancy term

Consider the importance of time

- RhoGAM® Brand has a mean elimination half-life of 30.9 days[3]
- ACOG dosing recommendations are based on a 24-day half-life[1]
- AABB dosing recommendations are based on a 25-day half-life[2]

RhoGAM®
Ultra-Filtered PLUS
Rh_0(D) Immune Globulin (Human)

Important Safety Information

RhoGAM® and MICRhoGAM® Ultra-Filtered PLUS Rho(D) Immune Globulin (Human) are made from human plasma. Since all plasma-derived products are made from human blood, they may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically the Creutzfeldt-Jakob disease (CJD) agent. RhoGAM® and MICRhoGAM® are intended for maternal administration. Do not inject the newborn infant. Local adverse reactions may include redness, swelling, and mild pain at the site of injection and a small number of patients have noted a slight elevation in temperature. Patients should be observed for at least 20 minutes after administration. Hypersensitivity reactions include hives, generalized urticaria, tightness of the chest, wheezing, hypotension and anaphylaxis. RhoGAM® and MICRhoGAM® contain a small quantity of IgA and physicians must weigh the benefit against the potential risks of hypersensitivity reactions. Patients who receive RhoGAM® and MICRhoGAM® for Rh-incompatible transfusion should be monitored by clinical and laboratory means due to the risk of a hemolytic reaction.

Please see next page for Brief Summary of RhoGAM® Brand Prescribing Information. For Full Prescribing Information, visit www.RhoGAM.com

Manufactured by Ortho-Clinical Diagnostics, Inc. for Kedrion Biopharma. All trademarks are the property of Ortho-Clinical Diagnostics, Inc.

Rh_0(D) Immune Globulin (Human)

RhoGAM® Ultra-Filtered PLUS (300 µg) (1500 IU)

MICRhoGAM® Ultra-Filtered PLUS (50 µg) (250 IU)

Rx Only

For Intramuscular Injection Only

Prefilled syringes, preservative-free (thimerosal free), latex-free delivery system

INDICATIONS AND USAGE

Pregnancy and other obstetrical conditions

For administration to Rh-negative women not previously sensitized to the Rh_0(D) factor, unless the father or baby are conclusively Rh-negative.

- Delivery of an Rh-positive baby irrespective of the ABO groups of the mother and baby
- Antepartum prophylaxis at 26 to 28 weeks gestation
- Antepartum fetal-maternal hemorrhage (suspected or proven) as a result of placenta previa, amniocentesis, chorionic villus sampling, percutaneous umbilical blood sampling, other obstetrical manipulative procedure (e.g., version) or abdominal trauma
- Actual or threatened pregnancy loss at any stage of gestation
- Ectopic pregnancy

To maintain an adequate level of anti-D, RhoGAM should be administered every 12 weeks. If delivery of the baby does not occur 12 weeks after the administration of the standard antepartum dose (at 26 to 28 weeks), a second dose is recommended to maximize protection antepartum.

Transfusion of Rh-incompatible blood or blood products

- Prevention of Rh immunization in any Rh-negative person after incompatible transfusion of Rh-positive blood or blood products (e.g., red blood cells, platelet concentrates, granulocyte concentrates)

CONTRAINDICATIONS

- The use of RhoGAM and MICRhoGAM is contraindicated in Rh-positive individuals.

DOSAGE AND ADMINISTRATION

For intramuscular use only, do not administer intravenously.

Pregnancy and other obstetrical conditions

RhoGAM (300 µg) (1500 IU)
- Postpartum — if the newborn is Rh-positive. Administer within 72 hours of delivery.
- Antepartum —
  - –Prophylaxis at 26–28 weeks gestation.
  - –At or beyond thirteen weeks gestation: administer within 72 hours when suspected or proven exposure to Rh-positive red blood cells occurs resulting from invasive procedures, abdominal trauma or obstetrical manipulation, ectopic pregnancy, pregnancy termination or threatened termination.

Administer every 12 weeks starting from first injection to maintain a level of passively acquired anti-D. If delivery occurs within three weeks after the last antepartum dose, the postpartum dose may be withheld, but a test for fetal-maternal hemorrhage should be performed to determine if exposure to >15 mL of red blood cells has occurred.

MICRhoGAM (50 µg) (250 IU)

- Administer within 72 hours of actual or threatened termination of pregnancy (spontaneous or induced) up to and including 12 weeks gestation.

Transfusion of Rh-incompatible blood or blood products

Administer within 72 hours.

RhoGAM (300 µg) (1500 IU)
- 2.5–15.0 mL Rh-positive red blood cells
- >15.0 mL Rh-positive red blood cells (multiple syringes)

MICRhoGAM (50 µg) (250 IU)
- < 2.5 mL Rh-positive red blood cells

WARNINGS AND PRECAUTIONS

Warnings

- For intramuscular use only, do not inject intravenously.
- In the case of postpartum use, the product is intended for maternal administration.
- Do not inject the newborn infant.
- Patients should be observed for at least 20 minutes after administration.
- Administer with caution to patients who have had prior severe systemic allergic reactions to human immune globulin.
- RhoGAM / MICRhoGAM contain a small quantity of IgA. There is a potential risk of hypersensitivity in IgA deficient individuals.
- Patients treated for Rh-incompatible transfusion should be monitored by clinical and laboratory means for signs and symptoms of a hemolytic reaction.
- Store at 2 to 8°C. Do not store frozen.
- Do not use after the expiration date printed on the syringe.

Parenteral drug products should be inspected visually for particulate matter, discoloration and syringe damage prior to administration. Do not use if particulate matter and / or discoloration. The solution should appear clear or slightly opalescent.

Use of Plasma Derived Products

RhoGAM and MICRhoGAM are made from human plasma and may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically the Creutzfeldt-Jakob disease (CJD) agent. The risk that such products will transmit an infectious agent has been reduced by screening plasma donors for prior exposure to certain viruses, by testing plasma for the presence of certain current virus infections and by using pathogen removal and inactivation techniques during the manufacturing process. All of the above steps are designed to increase product safety by reducing the risk of pathogen transmission.

Despite these measures, such products can still potentially transmit disease. There is also the possibility that unknown infectious agents may be present in such products. All infections thought by a physician possibly to have been transmitted by these products should be reported by the physician or other healthcare provider in the United States to Ortho-Clinical Diagnostics, Inc. at 1-800-421-3311. Outside the United States, the company distributing these products should be contacted. The physician should discuss the risks and benefits of these products with the patient.

ADVERSE REACTIONS

Adverse events (AE) after administration of RhoGAM and MICRhoGAM are rare.

The most frequently reported AEs are anti-D formation and injection site reactions, such as swelling, induration, redness and mild pain or warmth. Possible systemic reactions are skin rash, body aches or a slight elevation in temperature. Severe systemic allergic reactions are extremely rare. Patients should be observed for at least 20 minutes after administration. There have been no reported fatalities due to anaphylaxis or any other cause related to RhoGAM or MICRhoGAM administration.

As with any Rh_0(D) Immune Globulin (Human), administration to patients who are Rh-positive or have received Rh-positive red blood cells may result in signs and symptoms of a hemolytic reaction, including fever, back pain, nausea and vomiting, hypo- or hypertension, hemoglobinuria/emia, elevated bilirubin and creatinine and decreased haptoglobin.

RhoGAM and MICRhoGAM contain a small quantity of IgA (less than 15 µg per dose). Although high doses of intravenous immune globulin containing IgA at levels of 270-720 µg/mL have been given without incident during treatment of patients with high-titered antibodies to IgA, the attending physician must weigh the benefit against the potential risks of hypersensitivity reactions.

DRUG INTERACTIONS

Immune globulin preparations including Rh_0(D) Immune Globulin (Human) may impair the efficacy of live vaccines such as measles, mumps and varicella. Administration of live vaccines should generally be delayed until 12 weeks after the final dose of immune globulin. If an immune globulin is administered within 14 days after administration of a live vaccine, the immune response to the vaccination may be inhibited.

Because of the importance of rubella immunity among women of childbearing age, the postpartum vaccination of rubella-susceptible women with rubella or MMR vaccine should not be delayed because of the receipt of Rh_0(D) Immune Globulin (Human) during the last trimester of pregnancy or at delivery. Vaccination should occur immediately after delivery and if possible, testing should be performed after 3 or more months to ensure immunity to rubella and if necessary, to measles.

USE IN SPECIFIC POPULATIONS

Pregnancy Category C

Animal reproduction studies have not been conducted with RhoGAM or MICRhoGAM. The available evidence suggests that Rh_0(D) Immune Globulin (Human) does not harm the fetus or affect future pregnancies or the reproduction capacity of the maternal recipient.

Rh Blood Type

RhoGAM or MICRhoGAM Rho(D) Immune Globulin (Human) should only be administered to Rh-negative patients exposed or potentially exposed to Rh-positive red blood cells to prevent Rh immunization.

OVERDOSAGE

Repeated administration or increased dosage in Rh-negative individuals should not cause more severe or more frequent adverse reactions than the normal dose. Patients who receive RhoGAM or MICRhoGAM for Rh-incompatible transfusion should be monitored by clinical and laboratory means due to the risk of a hemolytic reaction.

DESCRIPTION

RhoGAM and MICRhoGAM Rh_0(D) Immune Globulin (Human) are sterile solutions containing immunoglobulin G (IgG) anti-D (anti-Rh) for use in preventing Rh immunization. They are manufactured from human plasma containing anti-D. A single dose of RhoGAM contains sufficient anti-D (300 µg or 1500 IU) to suppress the immune response to up to 15 mL of Rh-positive red blood cells. A single dose of MICRhoGAM contains sufficient anti-D (50 µg or 250 IU) to suppress the immune response to up to 2.5 mL of Rh-positive red blood cells.

The final product contains 5 ± 1% IgG, 2.9 mg/mL sodium chloride, 0.01% Polysorbate 80 (non-animal derived) and 15 mg/mL glycine. Small amounts of IgA, typically less than 15 µg per dose, are present. The pH range is 6.20–6.55 and IgG purity is ≥ 98%. The product contains no added human serum albumin (HSA), no thimerosal or other preservatives and utilizes a latex-free delivery system.

CLINICAL PHARMACOLOGY

RhoGAM and MICRhoGAM act by suppressing the immune response of Rh-negative individuals to Rh-positive red blood cells. The mechanism of action is unknown. RhoGAM, MICRhoGAM and other Rh_0(D) Immune Globulin (Human) products are not effective in altering the course or consequences of Rh immunization once it has occurred.

NOTE: For complete prescribing information, see package insert.

[Human Papillomavirus Quadrivalent (Types 6, 11, 16, and 18) Vaccine, Recombinant]
GARDASIL®
Each 0.5 mL dose contains human papillomavirus L1 protein of each type adsorbed on amorphous aluminum hydroxyphosphate sulfate adjuvant as follows: Type 6 (20 mcg), Type 11 (40 mcg), Type 16 (40 mcg), Type 18 (20 mcg)
Vaccine is prepared from fermentation cultures of a recombinant strain of yeast *Saccharomyces cerevisiae* containing the genes for the human papillomavirus L1 protein of each type (6, 11, 16, 18).
Contains no preservative or antibiotics.
Rx only

(558-3890) 0.5 mL Single-Dose Vial
(558-3149) 10-Pack of 0.5 mL Single-Dose Vial
(558-7846) 6 Pack of 0.5 mL Luer Lok Prefilled Syringes

β-LIFTx®
Salicylic Acid Peel Kits

Exclusive!

A VERSATILE, PROFESSIONAL CHEMICAL PEEL HYGIENICALLY PACKAGED IN A FULL PROCEDURE KIT

STOCK UP! for REJUVENATION SEASON!

COMPLETE KIT

β-LIFTx® is packaged for a successful patient experience and contains the following:

- 2 alcohol precleanse pads
- 1 vial of either 20% or 30% salicylic acid in an alcohol solution
- Dispensing cup and applicator sponge
- 1 tube of 0.75 oz. HydroLotion® for post-procedure skin care
  - Uniquely formulated with special petrolatum fraction to provide deep, long-lasting moisturization
  - Noncomedogenic, hypoallergic, fragrance and paraben-free

Each kit is hygienically packed for a single patient use and packed 24 kits per case.

2/0 20% Salicylic Acid Peel Kits 118-7633

3/0 30% Salicylic Acid Peel Kits 118-7632

β-LIFTx® is a registered trademark of DermThink LLC and is used under license. All rights reserved. No mix and match. Free goods ship with order.
